

# Refinement Protocol - Squared Away

## LUMON INDUSTRIES — MACRODATA REFINEMENT DIVISION

Refiners, your next data sequence requires completion in two phases:

Phase 01: Apply foundation protocol by shading cells according to the **BLACK** sequences.

Phase 02: Fill remaining cells, then perform refinement by erasing cell according to the **RED** sequences.

Refer to the employee handbook for more information: <https://en.wikipedia.org/wiki/Nonogram>

*Note: Refinement tools (pencil and eraser) suggested. This work is mysterious and important.*
